

METHODS AND COMPOSITIONS FOR TREATING ERECTILE DYSFUNCTION

ABSTRACT OF THE DISCLOSURE

[00103] Methods are provided for increasing libido and/or treating erectile dysfunction in a man. The methods include the administration of a formulation testosterone alone, another fast-acting drug to treat erectile dysfunction or a combination of the testosterone and the other drug where at least one is delivered by aerosolization. The formulation is preferably aerosolized and inhaled into a patient's lungs where particles of testosterone and/or the fast-acting erectile dysfunction drug deposits on lung tissue and then enter the patient's circulatory system.
